

I'd like to go on record with STRONG opposition to the proposal that radio stations be required to record all programming. First of all I can think of very few instances in the last 30 years when this would have been needed for any purpose. Second of all, the expenses involved to facilitate this technically would be crushing to a small market station, many of which are struggling to maintain good service to their local communities as it stands now. Please, this is a solution to a problem that does not exist, at least in small market radio!!
Thank You
